TRAIN DATASET

- 4 classes
 - KO: 140 samples
 - OK: 80 samples
 - RzKO: 55 samples
 - RzOK: 50 samples

DATASET

TEST DATASET

- 4 classes
 - KO: 16 samples
 - OK: 9 samples
 - RzKO: 14 samples
 - RzOK: 16 samples

APPROACHS

1. Gamma transform
2. Gamma for augmentation
3. Only Normal sample
4. crop

The background is a solid dark blue. On the left side, there is a series of vertical, wavy lines in a vibrant red color. Overlaid on these red lines are several thick, diagonal blue lines that cut across the frame from the top-left towards the bottom-right. The text 'GAMMA TRANSFORM' is centered in the upper half of the image.

GAMMA TRANSFORM

GAMMA TRANSFORM

- Apply gamma on all dataset
- Do not use use original data

CROSS VALIDATION

- Use StratifiedKFold
- 5 FOLDS
- Save weights of best cross-validation
- ResNet50 classifier
- Loss function: sparse categorical crossentropy
- Optimizer: SGD
- Learning rate: Cosine Decay with Warm-Up
 - `weight_decay=5e-4`,
 - `momentum=0.9`
- Train for 12 epochs
- `gamma_value = 1.5`

RESULT FOR CROSS VALIDATION

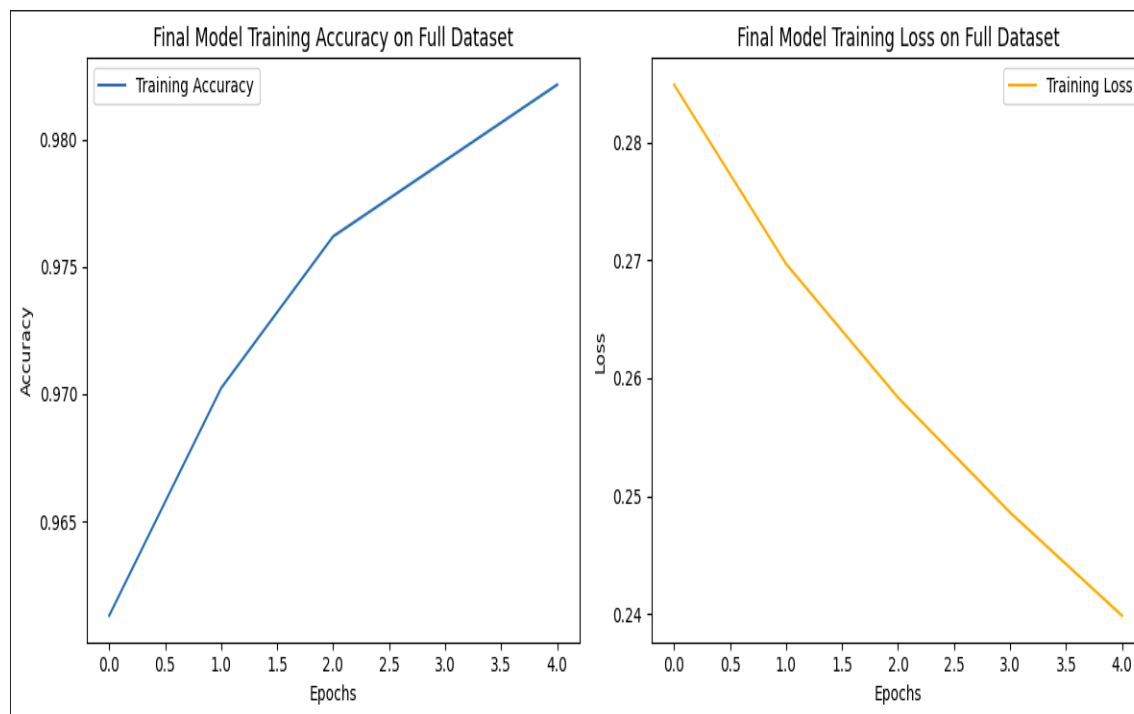

MAIN MODEL

- Load best weights from cross-validation
- Use whole dataset for train
- Loss function: sparse categorical crossentropy
- Optimizer: SGD
- Learning rate: fixe(0.01)
- Train for 5 epochs

The background is a solid dark blue. On the left side, there is a decorative graphic consisting of numerous thin, wavy lines. These lines are colored in a gradient from light blue at the top to red at the bottom. Three thicker, solid blue diagonal lines cross the graphic from the top left towards the bottom right.

TRAINING FINAL MODEL

```
Epoch 1/5
11/11 ————— 38s 3s/step - accuracy: 0.9594 - loss: 0.2748
Epoch 2/5
11/11 ————— 10s 206ms/step - accuracy: 0.9704 - loss: 0.2598
Epoch 3/5
11/11 ————— 3s 208ms/step - accuracy: 0.9756 - loss: 0.2481
Epoch 4/5
11/11 ————— 3s 209ms/step - accuracy: 0.9778 - loss: 0.2383
Epoch 5/5
11/11 ————— 3s 209ms/step - accuracy: 0.9788 - loss: 0.2298
```

An abstract graphic on the left side of the slide, featuring a series of wavy, vertical lines in red and blue that create a sense of depth and movement. The lines are set against a dark blue background.

RESULT FOR FINAL MODEL

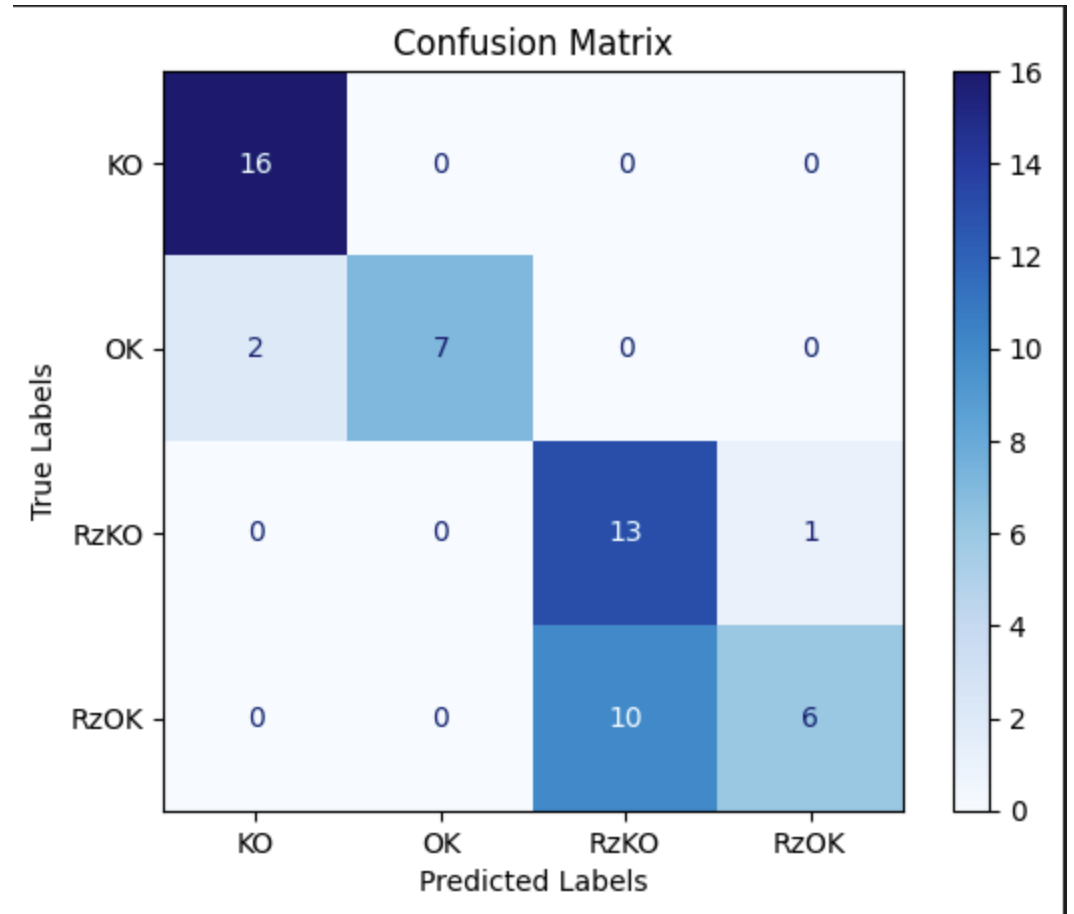

```
Found 55 files belonging to 4 classes.  
Class names: ['KO', 'OK', 'RzKO', 'RzOK']  
2/2 ————— 12s 6s/step - accuracy: 0.7903 - loss: 0.6748
```

```
Test Loss: 0.6993468999862671
```

```
Test Accuracy: 0.7636363506317139
```

```
1/1 ————— 2s 2s/step
```

```
1/1 ————— 2s 2s/step
```

GAMMA FOR AUGMENTATION

GAMMA FOR AUGMENTATION

- Apply gamma on all dataset
- add new images to dataset
- Dataset contain normal images + gamma version
- `gamma_value = 1.5`

CROSS VALIDATION

- Use StratifiedKFold
- 5 FOLDS
- Save weights of best cross-validation
- ResNet50 classifier
- Loss function: sparse categorical crossentropy
- Optimizer: SGD
- Learning rate: Cosine Decay with Warm-Up
 - `weight_decay=5e-4`,
 - `momentum=0.9`
- Train for 12 epochs

RESULT FOR CROSS VALIDATION

Average Training and Validation Accuracy Across Folds

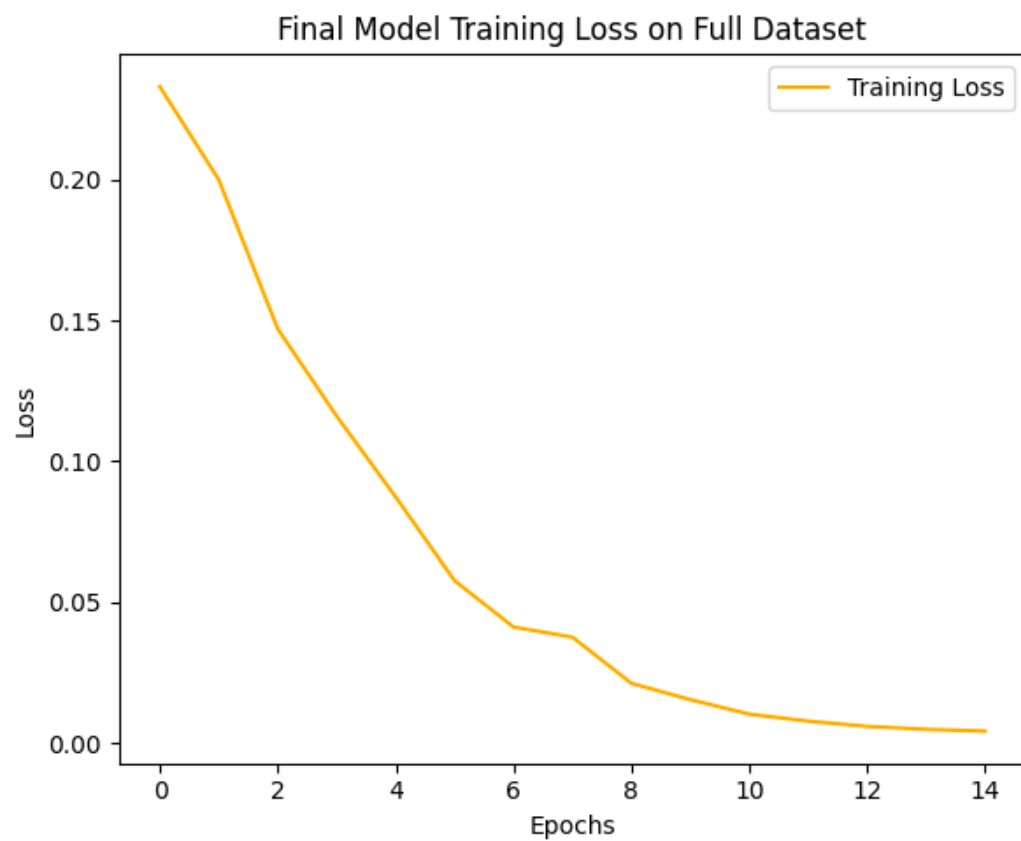

MAIN MODEL

- Load best weights from cross-validation
- Use whole dataset for train
- Loss function: sparse categorical crossentropy
- Optimizer: SGD
- Learning rate: Cosine Decay with Warm-Up
 - `weight_decay=5e-4`,
 - `momentum=0.9`
- Train for 15 epochs

The background is a solid dark blue. On the left side, there is a decorative graphic consisting of numerous thin, wavy lines. These lines are colored in a gradient from light blue at the top to red at the bottom. Three thicker, solid blue diagonal lines cross the graphic from the top left towards the bottom right.

TRAINING FINAL MODEL

```
Found 55 files belonging to 4 classes.  
Class names: ['KO', 'OK', 'RzKO', 'RzOK']  
2/2 ————— 3s 733ms/step - accuracy: 0.8509 - loss: 1.1111  
  
Test Loss: 1.1123638153076172  
Test Accuracy: 0.8545454144477844  
1/1 ————— 2s 2s/step  
1/1 ————— 1s 1s/step
```

The image features a dark blue background. On the left side, there is a series of wavy, vertical lines in red and blue, creating a sense of movement and depth. The lines are more densely packed on the left and fade out towards the right. In the center-right area, the text "ONLY NORMAL SAMPLE" is written in a bold, white, sans-serif font.

ONLY NORMAL SAMPLE

NORMAL SAMPEL

- In this model, I use only normal data without applying any modifications to the samples or increasing the dataset through augmentation.

CROSS VALIDATION

- Use StratifiedKFold
- 5 FOLDS
- Save weights of best cross-validation
- ResNet50 classifier
- Loss function: sparse categorical crossentropy
- Optimizer: SGD
- Learning rate: Cosine Decay with Warm-Up
 - `weight_decay=5e-4`,
 - `momentum=0.9`
- Train for 20 epochs

RESULT FOR CROSS VALIDATION

Training and Validation Accuracy for Each Fold

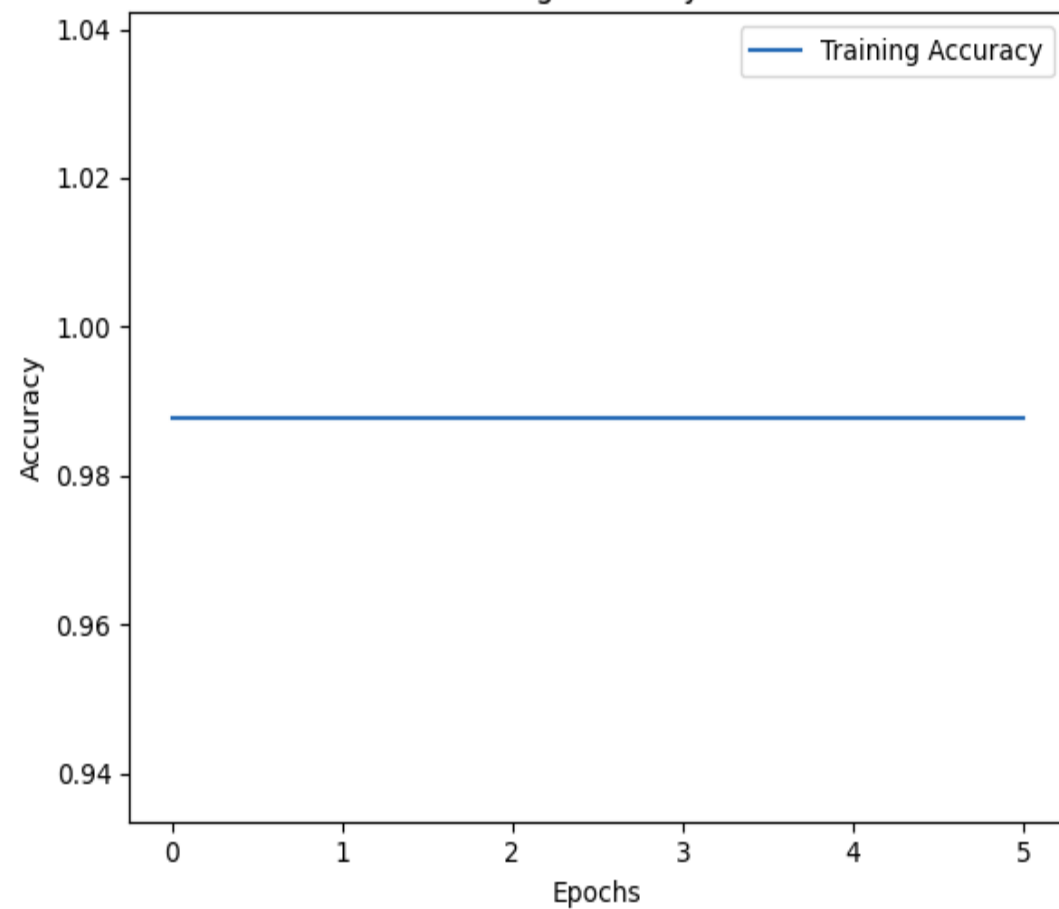

MAIN MODEL

- Load best weights from cross-validation
- Use whole dataset for train
- Loss function: sparse categorical crossentropy
- Optimizer: SGD
- Learning rate: Fixed (0.01)

The background is a solid dark blue. On the left side, there is a series of vertical, wavy lines in a vibrant red color. Overlaid on these red lines are several thick, diagonal lines in a bright cyan or light blue color, creating a dynamic, layered effect.

TRAINING FINAL MODEL

Final Model Training Accuracy on Full Dataset

Final Model Training Loss on Full Dataset

RESULT FOR FINAL MODEL

```
Found 61 files belonging to 4 classes.  
Class names: ['KO', 'OK', 'RzKO', 'RzOK']

CROP

CROP

- In this model, I crop central part of all images in our dataset to only train model on the part which we expect anomaly
- Hese you can see result after apply crop function on images in dataset

- 
- The model performs very poorly, so I have not included the results here.
